
URBAN BLOSSOM
UNIQUE DESIGNS FOR UNIQUE EXPERIENCES

THE URBAN BLOSSOM EXPERIENCE

Designed with an affinity for the landscape and their specific settings, Urban Blossom retreats allow you to reconnect with nature, improve your wellbeing and revitalise your senses - while wrapped in style and luxury.

OUR BUSINESS

We design, deliver and furnish sustainable buildings for private clients, as well as the hotel and leisure industry. In addition to our range of premium retreats, we also create and deliver bespoke designs for specific locations and settings.

CRAFTSMANSHIP

Urban Blossom retreats have been designed to a high standard of luxury and comfort, ensuring materials and finishes are of premium quality and durability. We use textures and design through the combination of beautiful interiors, unexpected forms and clean lines.

LOW IMPACT

Urban Blossom buildings are designed to sit lightly within the landscape. Using sustainable sourcing, all of our buildings are designed and constructed to be low-carbon, sustainable and energy efficient.

ECO-CONSCIOUS

Sustainable architecture is reflected in our building's materials, construction methods, resource use and design in general. The design must also facilitate sustainable operation during the building life cycle. From thermal efficiency such as ground source heat pumps to using innovative building products, we are committed to delivering responsible designs.

CONSTRUCTION

Urban Blossom uses Modern Methods of Construction (MMC) to create streamlined factory build and delivery solutions for clients. Installation is fast, with buildings delivered in modular sections, creating minimal time-lines unlike traditional builds.

SCREW PILES

Our lodges can be sited on screw piles. Earth screws are an eco-friendly alternative to concrete pads, as they hold less embodied carbon, are faster to install, cause less surrounding damage, with no excavation, and they are removable, reusable and recyclable.

WARRANTY

Our buildings come with a 10 Year Platinum Seal manufacturers warranty. The lodges are built to BS3632 standards and can also be upgraded to full Building Regs if required.

THE POPPY

THE POPPY

Inspired by the curves of nature to create a striking architectural design, the Poppy offers luxurious accommodation for the discerning guest. The configuration is living and dining on the Lower level, and sleeping in the Middle level. A roof top terrace takes full advantage of the views.

Blending into the natural surroundings, but also remarkable in its own right as a beautiful piece of architecture, perfectly balanced within its environment.
